Product info

Decarbonizer Foam

Art.: 04.2114.9999
Aerosol can 500 ml

Decarbonizer Foam is a very powerful industrial foam cleaner and removes combustion/oil residues that have deposited on parts such as burners of central heating systems and parking heaters, intake manifolds, valves of combustion engines, EGR valves and on the outside of the engine block itself. Also effective for removing bioethanol oxidation (green deposits) in the float chamber of carburettors.

The product forms an active foam that has a very intensive effect on dirt and can be used without problems on both horizontal and vertical surfaces. The aerosol is equipped with 2 different nozzles to guarantee an optimal application of the foam.

- Thoroughly breaks down combustion residues, carbon and oil.
- Can prevent unnecessary replacement of expensive components.
- Mechanical/ultrasonic cleaning and disassembly are no longer necessary.
- NSF registered (class A8), register number 166029.
