Product info

High-Tef Oil 500 ml

Art.: 03.1176.9999
Aerosol can 500 ml

High-Tef Oil is a high-grade PTFE-based lubricating oil that provides extremely good lubrication under high pressure and within a wide temperature range from -50°C up to +250°C.

The PTFE remains intact over the decomposition temperature of the oil, as a result of which it retains perfect lubrication. Since dampness is repelled by this and because High-Tef Oil contains corrosion resistant ingredients, the product is particularly well suited to the treatment of difficult-to-access places where moisture can accumulate.

Due to its low frictional resistance and high penetrating power the product is ideal for use as a general lubricant for door stops, hinges, wiper mechanisms, window guides and other lubrication points. Additionally, it is an excellent transparent lubricant for places where grease would lead to an accumulation of dirt. What we have in mind here are lock plates and locks.

Because it cannot be washed away by water it is also perfectly suited to the many moving parts subject to the influence of weather. When applied during disassembly it helps facilitate the dismantling of seized parts.

The aerosol packaging makes High-Tef Oil very user-friendly and easy to use. Thanks to the unbreakable nozzle with straw, even hard-to-reach places can be treated without any problem. In addition, the aerosol is equipped with a special valve that allows it to be used in any position.

For ease of use, as a lubricant en route for example, or for retail, High-Tef Oil is also available in 75 ml cans.

- Provides perfect long-lasting lubrication.
- Loosens seized parts.
- Low frictional resistance.
- Wide temperature range (-50°C to +250°C).
- Repels moisture.
- Protects against corrosion.
- Also suited to lubricate most plastic parts.
- OEM approved.
- Silicone free.
